

Senior Developer ASP.net

Location: Warwick Technology Park, Warwickshire
Salary: Negotiable depending on experience
Company: NBA Consultants
Job Type: Permanent

Senior ASP.Net Developer – Technical Architect – Solutions Developer - VB.Net - ASP.Net - .NET, - C# - XML,XSL,HTML,CSS,SQL

NBA is looking to hire an experienced .NET Senior Developer Technical Architect who has the ability to engage with clients and to understand their business needs and requirements as well as the technical skills to design/develop the solution.

You will work on a wide variety of projects, developing ASP applications and liaising directly with clients. You will be responsible for the full life cycle of projects, taking autonomy over projects and leading the project team.

Technical Skills Required:

- .NET development experience (VB.Net, ASP.Net) particularly enterprise-wide solutions
- Understanding of SOA (Service Oriented Architecture)
- Web Services/Technologies: SOAP, WSDL etc. HTML, CSS, XML, XSL

In addition to the technical skills, you will have excellent interpersonal and communication skills to enable you to interact with clients on a regular basis.

The successful applicant will contribute to the Company's technical strategy and be offered excellent career prospects. The role will be technically challenging but will include Microsoft training and the opportunity to work in a motivated team which is moving into new markets.

NBA is a Microsoft Gold Partner. You will be working with the latest Microsoft technology and have access to resources and training which will enhance your skills.
